The California State University, Quality Assurance Resource Repository (QuARRy) is a collection of online-blended teaching exemplars collected from participating CSU campuses. It is organized according to the CSU Quality Learning and Teaching (QLT) instrument, with 57 objectives organized across 10 sections. This allows faculty and instructional developers to view multiple ways to effectively meet a particular objective. Users who may be more familiar with the Quality Matters rubric will find the organization of these exemplars via QLT instrument to be similar. Our hope is that QuARRy will continue to grow and foster collaboration among CSU campuses, as well as serve as an open access resource to other institutions of higher education.

quarry.calstate.edu

We encourage you to submit faculty exemplars from your campus to be included in this repository. There is a submission form on the CSU Quality Assurance Resource Repository (QuARRy) site.

For questions regarding using or contributing to the CSU Quality Assurance Resource Repository, contact Cherie Vinopal, cvinopal@csusm.edu
